INITIATIVE

SET Plan Geothermal Implementation Working Group

The IWG is a forum where the **geothermal energy industry, the research community & public authorities** align efforts to accelerate the transition through research & innovation for the deployment of geothermal energy.

IWG Members:

- SET Plan Member States
- European Commission
- EERA Joint Programme Geothermal
- ETIP Geothermal & ETIP RHC
- EGEC

Vision Geothermal IWG

- Geothermal **heat** supplies:
 - > 25% of Europe's demand for space heating and cooling.
 - > 25% in the agricultural sector (greenhouses).
 - > 5% in industrial sectors in the low to medium temperature range.
- 10% of the **power production** in SET Plan countries is from geothermal power.
- **Underground thermal energy storage** supplies > 10% of space heating.
- **Co-production of minerals and critical raw materials (CRM)** in > 10 European regions.
- **Resilience**: 40% of the supply chain "Made in Europe" by 2030.
