

Advancing geothermal energy through strategic financing and policy frameworks

Authors: GEOTHERMICA Initiative Office
Alicja Wiktorja Stoklosa

Introduction

Geothermal energy is central to Europe's clean energy transition.

The GEOTHERMICA Initiative unites national R&I programs to accelerate deployment.

Founded in 2023, it builds a transparent and sustainable future.

Results

30+ projects granted, covering risk mitigation, storage, EGS, and cities.

Strengthened collaboration among public authorities across Europe.

Built trust, policy alignment, and international geothermal cooperation.

Joint Calls

3 joint calls launched → over 30 collaborative projects.

Partners from 16+ countries, total budget ~90 M€.

Strategic activities: workshops, knowledge transfer, and joint agendas.

Outcomes

- Public-private partnerships have scaled geothermal innovation.
- Policy frameworks and financing mechanisms are better aligned.
- International cooperation drives both R&D and market uptake.

Vision

Public collaboration for stronger geothermal energy progress in a net-zero world
